Summary

Computer Science (Data Science) graduate with hands-on experience in Machine Learning, OCR-based document processing, and data pipelines through internship and projects. Skilled in Python, SQL, and core ML concepts including classification, data preprocessing, and model evaluation. Interested in applying ML and automation to solve real-world problems in a production environment.

Technical Skills

Programming: Python, Java, SQL
Machine Learning: Supervised Learning, Classification, Regression, Data Preprocessing, Model Evaluation
Libraries/Tools: Pandas, NumPy, Scikit-learn, PaddleOCR, DocTR, PyTorch, TensorFlow
Tools & Platforms: Git, GitHub, VS Code, n8n, REST APIs, Basic AWS

Experience

Machine Learning Intern <i>Kreativetimebox</i>	Sept 2024 – Sept 2025 <i>Remote</i>
--	--

- Built a duplicate detection pipeline handling 10,000+ records using rule-based logic and fuzzy matching, reducing redundancy by 30%.
- Designed and integrated REST APIs to streamline data flow, improving system efficiency and enabling scalable ML workflows.
- Performed data annotation using Label Studio, creating high-quality datasets for improved model accuracy.
- Implemented PaddleOCR to extract structured text from documents, automating data extraction processes.

Projects

SmartDoc Parser – Invoice & Bank Statement Extraction [GitHub]	2025
---	------

- Built an end-to-end document intelligence system using DocTR and PaddleOCR to extract structured data with 98% accuracy.
- Designed a robust OCR pipeline with preprocessing, validation, and error handling to improve consistency and reduce parsing errors.
- Eliminated third-party API dependencies, improving scalability and reducing operational costs.

AI Lead-Gen & Outreach Automation Engine [GitHub]	2025
--	------

- Developed an AI-driven outreach platform integrating n8n, Supabase, Retell AI, and Google Gemini for automated lead qualification.
- Implemented scalable workflows with secure API key rotation and real-time call outcome analysis (human vs voicemail).
- Reduced manual outreach effort by 70% and improved lead-to-call conversion by 35%.

Education

Bachelor of Technology in Computer Science and Engineering (Data Science) Guru Nanak Institutions Technical Campus, Hyderabad CGPA: 8.42 / 10	Aug 2020 – May 2024
---	---------------------

Intermediate Narayana Junior College, Hyderabad CGPA: 9.78 / 10	Jun 2018 – Apr 2020
---	---------------------

Achievements

- Secured All India Rank 992 in Codekaze Naukri Engineers Week Test out of 1.05 million applicants.
- Achieved the Python for Data Science Certification from NPTEL IIT Madras with a score of 73%.
